Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

1. The reply filed on 6/5/03 consists of amendments to claims 28, 52, 60, 63; cancellation of claims 53-55, changes in the specification & drawings and remarks related to rejection of claims. The claims are not allowable as explained below.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the disengagement and engagement of the shock absorber by the hood must be shown or the feature(s) canceled from the claims 28-52, 56-58 and 60-70(s). No new matter should be entered.

It is advisable that two separate figures be provided (one for the disengaged position and the other for the engaged position) to clearly show the element(s) and their interactions for disengaging and engaging the shock absorber and its mounting in the box.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 2839

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 28-52, 56-58 and 60-70 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure, which is not enabling. The mechanism or elements which make the shock absorber disengaged are critical or essential to the practice of the invention, but are not included in the claim(s), thus making it not enabled.

See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 28-52, 56-58 and 60-70 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Each of the independent claims 28, 60 and 63 recite that the opening of the hood of a box disengages a shock absorber but it does not specify any element from which the shock absorber is disengaged from. To start with the claim does not specify to what element the shock absorber is engaged with. The claims simply recite the receptacle is suspended by the shock absorber, this simply implies that the receptacle is attached to the shock absorber. How the hood of the box removes this attachment is not clear.

7. Claims 28-52, 56-58 and 60-70 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted

Art Unit: 2839

elements are: The mechanism or elements by which the shock absorber is disengaged are missing.

Response to Arguments

8. Applicant's arguments with respect to claims 28-52, 56-58 and 60-70 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
